

# Genetic Counseling Now!!

## Genetic Counseling Forever!!

Greetings All!

Just so you know, we have a record NINE first year students, and soon we'll have over 225 USC alumni! As students and alumni interact locally and nationally, I am amazed at the depth of the USC network. **Our shared history is an instant bond.**

Many have asked about our Genetic Counseling Endowment, money that is permanently invested to generate interest income that will make a difference in the Program. With your generosity, we've raised over \$200,000 for the Endowment since we started in 2013. Individual donations from genetic counselors like you, sponsorship of our Fall Symposium, and several generous contributions from community leaders have created a substantial investment already.

**We'd like to ask you to make an annual contribution to the Genetic Counseling Program.** You know better than anyone the value of your education and the needs of students in training. Your contribution can affect genetic counseling students now, and forever.

- Maybe you'd like to support the immediate needs of the 2016-2017 genetic counseling students. Remember how hard it was to travel to clinical rotations? Would you like to HOST a current student (Help Our Students Travel)? Choose **Genetic Counseling Now!** .....and we'll use your donation to help fund student travel stipends this year!

- Perhaps you'd like to know your money is permanently working to improve the Program. The interest income from your contribution will help keep our curriculum fresh and on the cutting edge. Choose **Genetic Counseling Forever!** .....and know your money will be permanently invested in contemporary genetic counselor education!

Please help us build up the Program, at the same time strengthening your connection and the future connections of USC Genetic Counseling alumni. Thank you so much for your annual contribution. **We couldn't do it without you!**
